

OVC

📍 KILIFI SITE BRIEF

PARTNERS

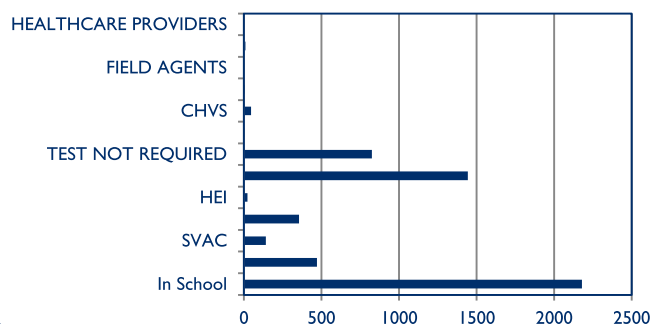

CIPK KILIFI OVC SITE

Kilifi satellite office is located in Sokoni ward, Kilifi North constituency. It is one of fast developing town in Kilifi County, the site under Tujitegemee project serves 4 wards; Sokoni 925(M-457, F- 468), Mnarani 617(M-283, F- 334), Kibarani 577(M- 289, F- 288) and Tezo 531(M-273, F-258). In COP 22 OVC program the site enrolled a comprehensive caseload of 2651 against the COP target of 2313 and served 2651 OVC. From the total caseload Kilifi site has 59 SINOVUYO and 183 boys in CBIM preventive programs.

HH visit at Kibarani

AGYW CATEGORIES

SITE ACTIVITIES

The site operation and daily deliverables are exclusively guided by the case management standard operating procedures under the 4 Domains as listed below;

HEALTHY

This domain includes interventions to support the achievement of health outcomes, build health and nutrition knowledge and skills in caregivers, and facilitate access to key health services especially HIV testing, care and treatment services, psychosocial support i.e. Emergency Fund, Transport to care, Nutrition Education-PD, Hearing, Emergency hospital bills, NHIF and Growth monitoring. In this financial year 6 OVC (2 from Tezo and 4 from Kibarani) received transport to facility for treatment.

SAFE

This domain includes interventions to prevent and mitigate violence, abuse, exploitation and neglect of children and adolescents, including sexual and gender-based violence. Also supporting OVC with Birth Certificates and any other protection document.

STABLE

This domain includes interventions that reduce economic vulnerabilities and increase resilience in adolescents and families affected by and vulnerable to HIV. I.e. Offering entrepreneurship and financial literacy skills, supporting businesses with business boost, Productive assets, Income generation activity grants, business monitoring for better outcomes and increasing uptake of VSLAs. For example this financial year 11 caregivers joined 4 VSLA groups and have a total savings of KSh. 1450. We also give 59 caregivers Emergency Cash Transfer and 57 caregivers with Business grants to empower themselves.

SCHOOLED

This domain includes interventions to support children and adolescents affected by and vulnerable to HIV to overcome barriers to accessing education including enrollment, attendance, retention, and progression and/or transition. This includes monitoring of OVC for school attendance, supporting with school fees and levies, scholastic materials, Uniform and dignity pack for adolescent girls, as well as vocational training fees. In This Financial Year we paid school fees and levies for 106 students to enable their retention in school.

STRATEGIC PARTNERS/STAKEHOLDERS

Collaboration is done with other organizations/stakeholders

1. USAID-STAWISHA (Clinical Partner).
2. ZINDUKA SUPPORT GROUP

USAID-STAWISHA (Clinical Partner)

We work jointly with the clinical partner to track and monitor the children on care. The joint activities are tailored towards ensuring continued zero missed appointments, zero missed drug ingestion, viral load suppression and zero seroconversion of the HIV-exposed infants aimed at achieving 95:95:95.

Further to this, the joint activities include MDTs at the facility level, case conferencing and household visits for CALHIV with high VI enrolled in Jua Mtoto Wako suppression initiative for suppression plan development and service delivery. These activities do not exclude the Department of Health at the Facility level

ZINDUKA SUPPORT GROUP

Tujitegemee project in its implementation strategy has been divided into domains where one of it is stable, taking care of household needs. The needs are prioritized in a case plan document, resources being inadequate we link our caregivers with other partners e.g. Zinduka Support Group.

We work jointly with Zinduka Support Group at Shingle GRC, in Sokoni Ward where our caregivers enrolled are able to get cash transfer, Training on financial literacy, treatment literacy, and psychosocial support to help them better themselves. CHVs were also trained on new ART guidelines and VL cut off

Ongoing classroom session

OTZ at KCH

SAFE SPACE OVERVIEW

We have a safe space for CALHIV at Kilifi County Hospital where our CALHIV can congregate for OTZ, Team Building activities, Counselling and other health services.

We have a Zinduka Support Group in Shingle, in Sokoni Ward where our caregivers enrolled are able to get educational/training especially financial literacy, treatment literacy, and psychosocial support to help them better themselves.

At the site office where need be our caregivers and OVC can come for help in all our service areas;

We take opportunity as the site team to advice caregivers and OVC on matters of adherence, relationships with other family members and where necessary we direct them to the relevant authorities for help and we ensure their confidentiality during the same
